Hi Carlos,

This is Ana from the Acme Analytics product team 😊.

We'd love to hear your opinion about the new sales dashboard we released last week.

A few specific questions:

1. Is it easy for you to find the date and branch filters?
2. Do you feel the charts load quickly, or do they feel slow?
3. Is there any metric you miss on the main panel?

Any comment, even a short one, helps us a lot.

Thanks in advance!

Best,  
Ana Torres

Hi Ana,

To be honest I only started using it yesterday.

- I did see the filters, but the branch filter is a bit hidden, it took me a while to find it.
- About performance, some days it's fine and other days it feels "super slow" (I didn't measure, but it definitely feels slow).
- As for metrics, it might be useful to see the average ticket right on the main screen.

I haven't checked all the reports yet, so I might see more things later.

Regards,  
Carlos

Hi Laura,

Here's a summary of the feedback from Carlos López (Retail Norte client) about the new dashboard:

- He can find the filters, but says the branch filter is "hidden".
- He perceives intermittent performance: some days okay, other days "very slow" (no exact measurements).
- Suggests adding average ticket on the main screen.
- He hasn't checked all reports yet but says he'll keep testing.

Case status: open, waiting for your indication to close or follow up.

Best,  
Ana

Thanks, Ana.

This level of detail is enough for now.

Let's add to the backlog:

- Improve visibility of the branch filter.
- Evaluate performance during peak hours.
- Add average ticket to the main panel.

You can close this case and move on to the next client.

## THREAD 02 – Mobile app push notifications (long with follow-up)

[EVENT: question\_sent | timestamp: 2025-10-03 08:47:12 | actor: team\_member | status: open]

**Subject:** Feedback about mobile app notifications  
**Date:** Fri, 03 Oct 2025 08:47:12 -0600

Hi Mariana,

I'm Diego from the mobile product team.  
We're reviewing the experience of push notifications in the app.

Could you help us by answering these questions?

1. On a normal day, how often do you receive notifications from us?
2. Do they feel useful or mostly "noise"?
3. Have you had any issues disabling or configuring them?

Whatever you can share is perfect, it doesn't have to be very detailed.

Best,  
Diego

Hi Diego,

I don't have the exact number, but I feel I get a lot of them.  
Especially "cart reminder" and "deal of the day", that's a bit annoying.

Configuring them is a bit confusing; I opened the menu and didn't really understand the difference between "alerts" and "important messages". In the end I just turned almost everything off.

Not sure if I answered everything, but that's what I remember.

Hi José,

Here's the summary of Mariana Pérez's feedback on push notifications:

- She feels she gets "a lot" of notifications, especially cart reminders and daily promotions.
- She says the settings menu is confusing (doesn't understand "alerts" vs "important messages").
- She ended up disabling almost everything out of frustration.

I suggest:

1. Reducing the frequency of marketing notifications for this segment.
2. Simplifying the settings menu with clearer labels.

Let me know if you want us to follow up.

Thanks, Diego.

Before making product decisions, please check whether the issue is consistent:

- Ask if the notifications that bother her most are every day or only during campaigns.
- Confirm whether she has ever considered uninstalling the app because of this.

After that, send me a brief follow-up summary.

Hi again, Mariana,

Thanks a lot for your previous reply! Just a couple of quick follow-up questions:

1. Do you feel the annoying notifications come almost every day, or only during certain periods (for example, special promotions)?
2. Did you ever think about uninstalling the app because of this, or did you only disable notifications?

This helps us a lot to prioritize changes.

Hi Diego,

Quick answers:

1. I'd say it's almost daily, especially the cart reminders.
2. I haven't uninstalled the app, but I did think about it twice. In the end I preferred to turn notifications off because the app is useful for buying.

Hope this helps.

Hi José,

Follow-up on Mariana's case:

- Annoying notifications: almost daily, especially cart reminders.
- She did consider uninstalling the app, but decided to disable notifications instead because the app is still useful for purchases.

I propose:

- Lower frequency of cart reminder notifications.
- Adjust segmentation so she doesn't get daily promotions.

Let me know your thoughts.

Hi,

The file opens fine, but the date format changes (it shows up as text).  
The columns are clearer than before, I barely had to move anything.

From my side it's all good if you fix the date formatting.

Just to better understand:

1. When you say there are too many colors, which ones confuse you the most (for example, orange, purple, etc.)?
2. What would help you better distinguish tickets that are already closed? (icon, bigger label, extra column, etc.)

For closed tickets, I'd like them to show in a light gray and clearly say "CLOSED" instead of just an icon.

Raúl,

Follow-up from Lucía:

- Colors that confuse her most: orange and purple (she doesn't remember what each one means).
- She'd like closed tickets to be in light gray with an explicit "CLOSED" label.

I suggest adjusting the color palette and adding that textual label.

Hi Ana,

I implemented the orders endpoint, but I had to guess some fields because they weren't clearly documented. Authentication is fine, though the cURL example took me a bit to understand.

What took the most time was debugging a 400 error with no clear message.

Hi Laura,

Summary of Andrés' feedback:

- Implemented the orders endpoint but had to guess some fields (incomplete documentation).
- Authentication OK, but cURL example not very clear.

- He lost time debugging a 400 error without a detailed message.

I propose:

- Completing the field descriptions in the docs.
- Improving error messages for 4xx codes.

Shall we leave it like this?

## THREAD 10 – Branch performance report (short, 2 emails)

Hi Daniela,

We want to know if the new branch performance report is helping you.

Do you find the comparisons between branches and productivity indicators clear?  
Would you change anything about the format?

Best,  
Sofía

Hi Sofia,

Overall it's good. I'd only like to be able to sort branches by indicator (for example, from highest to lowest productivity).  
Other than that, everything is clear.

Hi Sergio,

We recently enabled the help center inside the app (FAQ, tutorials, etc.).

Have you used it?

If yes, did it help you solve your questions or did you still end up contacting support?

Thanks,  
Diego

Hi,

I glanced at it, but I almost always prefer to use the live chat.  
I read one FAQ but then didn't keep going.

I'm not really sure if it helped me, to be honest.

José,

Summary of Sergio's case:

- He just glanced at the help center, doesn't use it much.
- He prefers live chat.
- Not sure if it was useful; his answer is vague.

I suggest using this case as an example of low help center adoption.

## THREAD 12 – Date filters in financial dashboard (long, client error)

**Date:** Tue, 14 Oct 2025 08:50:00 -0600

Hi Karla,

I'd like to know how the new date filters in the financial dashboard are working for you.

1. Are they easy to understand (today, yesterday, last 7 days, custom range)?
2. Have you noticed any strange data when changing the date range?

Best,  
Valeria

Hi Valeria,

At first I thought the filter wasn't working because I didn't see any data, but I later realized I had set the range backwards (from 12/31 to 01/01).

Other than that, they're clear.

Once I thought data was missing, but I think it was because the day hadn't closed yet.

Hi Teresa,

Summary of Karla's case:

- At first she thought the filter was broken, but it was due to reversed dates (start/end inverted).
- After that, she understood it and finds it clear.

- Once she thought data was missing, but the day hadn't closed yet.

I suggest:

- Adding a validation when the start date is later than the end date.
- Showing a notice if the current day's data is still in progress.

Is this sufficient?

One weird thing is that some tables look very high-contrast, it makes my eyes a bit tired.

I suggest reviewing the color palette for tables specifically.

## THREAD 15 – Pending task reminders (long, customer confusion)

Hi Luis,

We recently activated automatic pending task reminders in your account.

Have you been receiving them?

If yes, do they arrive at helpful times, or do you feel they're not very useful?

Best,  
Jorge

Hi Jorge,

Yes, I get them, but I'm not really sure which task each reminder refers to.  
It just says "You have pending tasks today", but I can't tell which ones.

So sometimes I ignore it because of that.

Raúl,

Luis receives the reminders, but he doesn't understand which tasks they refer to because the text is generic ("You have pending tasks today").

That's why he often ignores them.

I suggest asking him for more detail on what information he would like to see in the email.

After that, send me the updated summary.

Hi again, Luis,

To better understand how to improve the reminders:

1. Would it help if the email listed the names of the pending tasks?
2. Would you like to see the due date of each task in that same email as well?

With your input we can adjust the design.

Best,  
Jorge

Yes, exactly that: show the task names and the due date, and if possible, the person responsible for each task.  
That would make the emails more useful.

Raúl,

Follow-up on Luis' case:

- He wants the reminder to include the task name, due date, and responsible person.
- With that, he says he'd use the reminder emails more.

I propose updating the reminder templates with this information.
